

21 August 1951

MEMORANDUM FOR: THE DIRECTOR OF NAVAL INTELLIGENCE

ATTENTION : Commander T. W. Joyce

FROM : Director of Communications

SUBJECT : Storage of Communication Equipment, [REDACTED]

25X1A

REFERENCE : Memorandum for the Chief of Naval Operations via  
Director of Naval Intelligence, Dated 31 October  
1950, Subject: "Storage of Mobile Radio Station"

1. The storage of the reference equipment was accomplished in March 1951. At the completion of the storage all Central Intelligence Agency representatives were withdrawn and the equipment left in the custody of the Supply Officer of the Naval Air Activity at that station.

2. This Agency desires a brief periodic report on the general condition of its equipment in storage at [REDACTED]. It has been recommended by the Office of Naval Intelligence that Central Intelligence initiate a periodic request for such a report rather than expect the Naval Air Activity to schedule this action. Upon this advice, approximately once every three months, this Agency will forward a letter requesting receipt of such a report from the Naval Air Activity thru the Office of Naval Intelligence.

25X1A

3. It is desired that the report very briefly cover the following points:

a. Damage or deterioration noticeable upon external examination. (The units are sealed and it is desired that they not be opened for examination).

b. Security:

1. Appraisal of physical security afforded by Naval Air Station guards covering this area.

2. Any decrease in physical security resulting from increased Naval Air Station activity adjacent to the storage area.

c. Contemplated plans adversely affecting the general security of this equipment.

d. Please consider this letter as a request for an initial report on our equipment covering the points outlined in paragraph 5a. cc.
